EXTRACTIVE SURGERY

CLINICAL INSTRUMENTARIUM · 2025 COLLECTION

Engineered for atraumatic tooth removal and socket preservation. Anatomical extracting forceps with cross-serrated beaks, reduced-weight AsaLady patterns, luxating root elevators, bone rongeurs, and delicate splinter retrieval instruments.

COLLECTION INDEX

01 **EXTRACTING FORCEPS** — P. 04
English, American & pediatric extraction forceps

02 **ASALADY FORCEPS** — P. 36
Lightweight ergonomic balanced exodontia forceps

03 **ROOT ELEVATORS** — P. 44
Bein, Cryer, Flohr, Winter & apical luxating elevators

04 **BONE RONGEURS** — P. 60
Beyer, Friedman & Blumenthal precision bone rongeurs

05 **ROOT-TIP PICKS** — P. 68
Micro-serrated fragment elevators & splinter forceps

EXTRACTIVE SURGERY

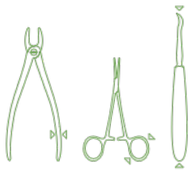

HOW TO USE THE INFORMATION

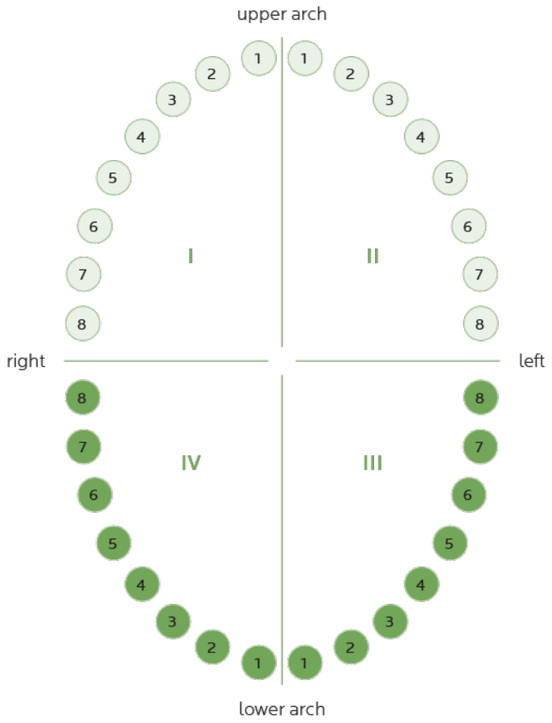

AsaLady

products ergonomically
designed for women's hands:

- smaller and lighter handles
- smaller finger holes
- reduced size

code starts with "W" or "SW"

VENPICK · EXTRACTING FORCEPS FOR CHILDREN

serrated tips

0101-1

Witzel extracting forceps are extremely versatile instruments that can be used to extract both teeth and roots.

The serrated rims, curved shape and slim profile make them effective on roots, preventing unwanted fractures.

These forceps are designed to amplify hand sensitivity and guarantee precision.

The scissor-like handle increases guidance while the narrow beaks make it possible to reach and firmly grip even small, deep root fragments.

Almost all impacted wisdom teeth can be handled with this Friedman elevator.

Inserted from above into the gap produced by bone resection, it dislocates the tooth upward and backward.

In the image: Friedman elevator and mirror in action on a fragment of third molar (double mirror + Friedman elevator).

Asa Dental syndesmotomes offer the advantage of an ergonomic handle and many easy-to-swap tips, helping solve the clinical case at hand.

They are generally very effective in preparing the field for atraumatic extraction, and many of them can be conveniently used as periotomes.

AUTOCLAVE INSTRUMENT PROTECTION LUBRICANT

Maximum protection of instruments in the autoclave. Penetrates and lubricates all instrument joints. Protects all dental and surgical instruments before and after sterilization. Instructions for use: oil all instrument tips, joints and fastenings before and after sterilization.

Special lubricant for dental and surgical instruments. Lubricates the joints of scissors, hemostatic and extracting forceps, bone rongeurs, needle holders etc., before and after sterilization. Does not dry out during sterilization. Provides protection from corrosion and other deposits and ensures proper operation of the instruments.
